Education, and Welfare, and Project Officer, forts to make publication and distribution volumes possible. Special appreciation goe Kramer, Contract Liaison, for her work in co publication and dissemination activities for the Medical Association publication to present data for the 205 health service areas (HSA's) designated under the National Health Planning and Resources Development Act of 1974 (PL #93-641). There is a separate volume of COP for each of the fifty states and the District of Columbia. Each presents state-specific detailed data for health service areas, demographic county groups, and counties, as well as summary national data for comparative purposes. Thus, the series provides the only compatible data base on physicians across all areas and should be of significant use to practitioners and researchers in the health care industry.

The data presented here are for the physician population practicing in the United States. Detailed characteristics are presented for all physicians with known addresses in a geographic region who are professionally active. In addition, counts of physicians who are inactive or are not classified are provided on each table.

December 31, 1975 was selected as the point in time of this report for the following reasons;

- PL #93-641 was signed in January, 1975, and it
 was only during 1976 that significant activity was
 undertaken in response to this legislation. Thus,
 1975 represents the last year in which the health
 care system was not affected by this major piece
 of legislation and, therefore, is the most appropriate base year for future analyses of the impact of this legislation.
- Because this represents the first statistical series
 of its scope, an exceptional amount of time had
 to be expended in the conceptualization of the
 project; preparation of data set, and writing of
 the necessary computer programs. However,
 plans are being developed for publication of
 these volumes on a more regular and current
 basis in the future.

The introductory material which follows provides definitions and discussions of the geographic aggregations and the specific physician characteristics tabulated. This publication's relationship to other AMA publications and to other data sources is detailed. In addition, the American Medical Association Physician Masterfile is described: a list of the health service areas covered in this volume is given; and a sample of the questionnaire which is sent to physicians for the purpose of updating the AMA Physician Masterfile is included. Twenty-one tables listed in the Table of Contents-six national tables, which are repeated in all 51 volumes, and 15 state-specific tables providing: state, HSA, county groups and county data-follow immediately. An additional table which provides medical school data is included for states having medical schools.

who were temporarily in foreign from all tabulations. All data prition were developed from the Association Physician Masterfile

Physician Characteristics The distributions of physicians are described in this volume in terms of a number of professional characteristics, with some individual characteristics crosstabulated with others. Key characteristics include specialty, major professional activity, age, sex, board certification, Federal or Non-Federal employment, and state and county of graduation. The thirty-six specialty classifications used in this publication are the same as those used in other AMA publications such as the Physician Distribution and Medical Licensure in the U.S., 1976 and are presented in Table B. A physician's specialty classification is defined as that in which he/she reports spending the largest number of practice hours. A number of county tables utilize the classification system of primary care/non-primary care specialists. Primary care physicians, for the purposes of these tables, are physicians whose specialty is general practice, family practice, internal medicine, pediatrics, and obstetrics/gynecology. Another area of general interest is specialty board certification. Certification indicates

that the physician has satisfactorily completed an ex-

amination in an area of specialization and has taken all

ig physician characteristics are: Age as defined of intervals of under 35, 35 to 44, 45 to 54, 55 to 75, and 75 and over; Federal employment as is employment by the Veterans Administration, Services, the U.S. Public Health Service, and deral Service.

I in several forms. Physicians who graduated ited States medical schools are categorized by ol of graduation and the state in which they cure practicing medicine. In addition, physicians n a particular county group or county within a cross-categorized either as having graduated tedical school in the state, in a contiguous state, other state, in Canada, or outside the United d Canada.

RELATIONSHIP TO OTHER RICAN MEDICAL ASSOCIATION PUBLICATIONS AND TO THE COOPERATIVE LTH STATISTICS SYSTEM (CHSS)

ugh previous AMA publications, Physician tion and Medical Licensure in the U.S., and School Alumni, have reported similar informaaracteristics of Physicians provides more detailmation than previously available in published

ublication has two key features: greater detail of no characteristics and greater detail with o geographic units. More detail is provided for ributions, sex, and specialty board certificar states, county groups, individual counties, the health service areas. Thus, this publication to meet a more extensive set of data needs not ther AMA publication series.

other AMA publication series. a collection effort to provide information to the data published in *Characteristics of Physi*being undertaken by the Cooperative Health System (CHSS). Although this system evento collect data on a state-by-state basis for thirith related occupations, reports published as a CHSS have not contained the level of detail cies, uniformity in quality and effort is no And indeed the CHSS is collecting physician of ly a limited number of states at this time.

INTERPRETATION OF TABL

Because of the complexity and detail of presented in these volumes, care must be extheir interpretation. A few explanatory necessary about the treatment of the classifications used in these tabulations.

As mentioned previously, it was felt that data

sionally active physicians would be most research and planning purposes. At the sa however, it was felt that the total pool of manpower should be represented in these volu dual purpose caused some problem in the des tain tables because of the inactive and not cla tivity categories. These two categories are in the tabulations but are treated differently dep the type of cross-tabulation involved. Ger tables in which specialty is cross-tabulated w professional activity, the inactive and not physicians are included in the total value by distributed by specialty. Instead, these two provided at the bottom of the specialty colu "Inactive," "Non-classified," and Unknown". To arrive at the total value, th and not classified values should be added to t the other major professional activity categor applies to Tables 1, 3, 6, 9, 16, and 19. Address Unknown

Physicians with unknown addresses are incl

in Table 1 for informational purposes. Again, is not distributed throughout the table but is it the grand total. Physicians with unknown ade excluded from all other national tables; the grand total value on Table 1 exceeds the tota Table 2 plus the total in Table 3, and the total Table 4.

Availablity of Data

This concludes the description of data cor the COP series. Every effort has been made to the most frequently requested information in meaningful to most users. These data are a made available in the form of print tapes Bureau of Health Manpower. In addition, plan underway to publish the COP series on a regu

These observations are based on a comparison of the Annual for Massachusetts and the Characteristics of Massachusetts.

RECORD OF PHYSICIANS' PROFESSIONAL ACTIVITIES

DIRECTORY OF PHYSICIANS

Center for Health Services Research and Development

AMERICAN MEDICAL ASSOCIATION

535 N. Dearborn Street Chicago, Illinois 60610

Dear Doctor:

Please complete this questionnaire as soon as possible so that your official record is up-to-date with correct and current information for printing of the 1973 AMA DIRECTORY. Data obtained from this questionnaire will be aggregated and used to describe the distribution of physicians and to analyze health manpower. However, NO information from your record will be released to any organization for the purpose of developing independent physician data files.

Thank you.

Instructions

- 1. Please answer every question on the basis of your current activities.
- Indicate any changes. Information which you provided previously has been printed in this form. Please <u>complete</u> unanswered sections and make <u>dis-</u> <u>crete changes</u> where applicable.
- Upon completion, return the questionnaire at your <u>earliest possible con-</u> venience, using the preaddressed envelope.

Contents

The questionnaire is divided into four sections:

- <u>Professional Activities</u>—the types of activities in which each physician spends
 the most time during an average week.
- II. Specialization—the time physicians spend in their major fields of specialization.
